Cloud DCM-1 becomes Crestron Certified Integrated Partner

Cloud Electronics is very pleased to announce the latest development for the Cloud [DCM-1](#) Digitally Controlled Mixer. Working with the technical department at Cloud Electronics, Crestron has developed a driver for the DCM-1 that allows it to be integrated with Crestron control systems utilising the RS-232 port on the DCM-1. This driver allows Crestron and Cloud integrators / users to control multi-zone audio systems utilising the functionality and flexibility of the Cloud DCM-1.

This is a very exciting development for both Cloud and Crestron integrators. With 8-stereo inputs and 8-balanced line outputs allowing totally flexible configuration as individual zones or definable zone groups, the DCM-1 also accepts Bose and Amina [EQ cards](#) on each output to allow integration with high-quality speaker systems.

Further information on the [DCM-1](#) can be found on Cloud's website at www.cloud.co.uk.

Case Studies

The Case Studies area of the Cloud Electronics website is under construction and already highlights a number of case studies for Cloud products. Please take a moment to view the recently added studies at [Trinity College, Cambridge, UK](#), [St. Ann's School, Surrey, UK](#) and the [Waldorf Astoria in London, UK](#).

If you have examples you think should be featured here and on the Cloud website please send details to marketing@cloud.co.uk

Cloud Electronics - Networking Socially

Cloud Electronics has joined the social networking revolution and can be 'followed' on Twitter, 'liked' on Facebook and you can also 'become a friend' of Cloud's You-Tube channel. The social pages contain links to news items, to case studies, training videos and alerts to news associated with Cloud and Cloud products.

Just click any of these links to be taken to the Cloud's social pages.

For further information on any of these items please contact sales@cloud.co.uk or telephone +44 (0) 114 244 7051. Thank you for your continued support for Cloud Electronics Ltd.
