

CV Digital Amplifier Series 70V/100V

The New CV Digital Class-D Multi-Channel Amplifier Series from Cloud Electronics provides a range of feature-rich functions for commercial audio installers and users alike. On-board configurable DSP, a host of remote / third party control options and with simple non-network set-up via rear panel DIP switches the new CV-Series Multi-Channel Amplifiers are designed specifically for commercial use in Retail, Leisure, Hospitality, Commercial and Industrial applications.

Features:

- Digital Class-D Multi-Channel Amplifier Series
- Energy Efficient Switch Mode Power Supply
- High Quality A/D Input Convertors
- Comprehensive On-Board DSP
- Basic / Advanced User Modes
- Load Monitoring / Reporting
- Power Sharing Capability
- Ethernet / RS-232 for SNMP, Config & Control
- GPIO (General Purpose Inputs/Outputs)
- Rear Dip-Switch Configuration
- Two Aux Outputs
- 2U Lightweight Chassis
- Analogue VCA for Remote Volume (RL-1)
- Energy Star Compliant (Application Pending)

CV2500 Digital Amplifier

Two Channel Class-D Digital Amplifier
• 2 x 500W Output 70V / 100V

Variants: EK,AUS,NA Target Price £TBA
Availability: JULY 2016

CV4250 Digital Amplifier

Four Channel Class-D Digital Amplifier
• 4 x 250W Output 70V / 100V

Variants: EK,AUS,NA Target Price £TBA
Availability: JULY 2016

CV6160 Digital Amplifier

Six Channel Class-D Digital Amplifier
• 6 x 160W Output 70V / 100V

Variants: EK,AUS,NA Target Price £TBA
Availability: JULY 2016

CV8125 Digital Amplifier

Eight Channel Class-D Digital Amplifier
• 8 x 125W Output 70V / 100V

Variants: EK,AUS,NA Target Price £TBA
Availability: JULY 2016

Every Cloud product is exhaustively tested for electronic performance and sonic perfection in Sheffield, England.
