

## PLASA Focus

Leeds, April 2012

We'd like to extend a big thank-you to all customers, suppliers and industry colleagues who stopped by the Cloud Electronics booth at PLASA Focus 2012 last week.

Once again the show was very well attended and we can report an excellent response to the latest product developments from Cloud Electronics Ltd. In particular the wireless control interfaces currently in development for the Cloud DCM-1 Digital 8-Zone Mixer created a lot of interest and response. We will keep you informed of further developments in this area.

We hope you enjoyed the show and look forward to seeing you in the coming year.

## Prolight & Sound

Frankfurt, March 2012

S.E.A Vertrieb & Consulting chose to make an impact at Prolight & Sound in March 2012. Recently appointed as the distributor for Germany for Cloud Electronics S.E.A chose to display and demonstrate nearly the entire range of Cloud products for the duration of the show.

Highlights included the newly launched PM-SA range of paging microphones with message announcement capability, the new Cloud CXL-1600 Transformer Rack Tray and CXL-200T / CXL-400T Transformers for the Cloud VTX amplifier series and a DCM-1 controlled via a Crestron touch-screen interface.

## Did you know?

Cloud DCM-1 Digital 8-Zone Mixer

The DCM-1 Digital 8-Zone Mixer can be controlled with a PC or Crestron controller via the RS-232 port. If you would like to learn more please visit the [DCM-1 product page](#) at [www.cloud.co.uk](http://www.cloud.co.uk)

Alternatively contact [info@cloud.co.uk](mailto:info@cloud.co.uk) for further information.

## Cloud CXL-1600 / CXL-400T / CXL-200T

Now Shipping!

Cloud Electronics is very pleased to announce that the new Cloud CXL-1600 Transformer Rack Tray, the new Cloud CXL-400T 100V 400W Transformer and the new Cloud CXL-200T 100V 200W Transformer for the VTX Amplifier Series are all now shipping with immediate effect.

The [Cloud CXL-1600](#) Transformer Rack Tray is a heavy duty steel 19" housing with a removable top cover that allows up to 8 x CXL-40T/CXL-100T 100V toroidal transformers or up to 4 x CXL-400T/CXL-200T 100V toroidal transformers to be housed.

Both the [Cloud CXL-400T](#) and [Cloud CXL-200T](#) 100V toroidal transformers are recent additions to the Cloud Electronics range of high-quality 100V transformers. They allow one or any number of channels of the Cloud VTX-Amplifier Series to operate at high-impedance, otherwise known as 40 Ohms or 100V Line, rather than the default low-impedance, providing complete system design flexibility.

## Cloud PM-8SA / PM-4SA Paging Microphones

Now Shipping!

The recently launched Cloud PM-8SA and PM4-SA Paging microphones with 'spot-announcement' (pre-recorded message) capability are now shipping with immediate effect.

The [Cloud PM-8SA](#) Paging Microphone is an eight-zone paging microphone that also allows the playback of up to eight individual pre-recorded spot announcements / messages from an in-built SD-card slot. Messages can be played back manually by the operator or triggered remotely via a timer, switch, contact closure, relay, PIR or similar device across any number of selectable zones up to eight.

Offering a very similar feature-set the [Cloud PM-4SA](#) is a four-zone paging microphones also offering pre-recorded message playback of up to four messages across four zones.

An example application diagram for the PM-SA Series of Paging Microphones is available for [download here](#).

## New Product & Accessories Catalogue 2012

Available Now!

The new Cloud Electronics Product and Accessories Catalogue is available now and can be ordered or downloaded immediately. In addition to highlighting the new products it contains a number of handy application diagrams too.
